

CONCOR / Promise

Selecteren van een Rapport Template

Enno van der Velde / 07-06-2006

- Kies: 'Report', en 'Specify' in het menu
- Aan de rechterkant, onder 'Stored Report Specifications' -> 'Data Report' -> 'Project' vind je de nu gedefinieerde Rapport templates. Zie ook de screen-copy hier onder.

The screenshot displays the CONCOR web application interface within a Microsoft Internet Explorer browser window. The browser title bar reads "CONCOR[PROD][MEST][User:concr0100ev][CIC: 100(0)] - Microsoft Internet Explorer". The application has a menu bar with "Data Entry", "Report", "Export", "Help", and "Filter". Below the menu bar, there are buttons for "Specify", "List", "Status", "Table", and "CRF". The main content area is divided into several sections:

- DATA REPORTS**: A sidebar on the left containing a tree view for "REPORT & QUERY SPECIFICATION". It includes options like "Generate Report", "Preview Report", "Class & Format" (with sub-options for "Choose Report Class", "Format", and "Complexity"), "Content" (with "Title", "Subtitle", and "Endnote" fields), "Structure", "Filters" (with "Item Filter", "Record Filter", "Population Filter", and "Advanced/Designer Query Filter"), "Record Sorting", "Layout" (with "Max. # of rows per page" set to 90 and "Horizontal headers" checkbox), and "Save, Convert, New, Show".
- Standaard Rapport**: A central panel with a yellow background containing instructions: "All visible items below (whether marked or not) are used for Status Reports obtained via a link", "Every item you mark below is used as a column", and "Right-click to specify items to sort by".
- ITEMS ELIGIBLE FOR REPORTS**: A section with a plus sign icon.
- TOOLS FOR ELIGIBLE ITEMS**: A section with plus signs for "TREE EXPANSION" and "QUICK SELECTIONS".
- STORED REPORT SPECIFICATIONS**: A section with a minus sign icon, containing a tree view for "DATA REPORT" with sub-items "Project", "Standaard Rapport", "Standaard Rapport zonder naam patient", "Registry", and "Your own reports". Below this are status messages: "No Record Filter active or embedded", "No Population Filter embedded", and "No Advanced/Designer Query embedded".
